

HAPPY (2ND) RETIREMENT SUKIE

91 Years young, Sophia (aka Sukie) has tuned in her uniform after 26 years as a Volunteer with the SBPD. During this time, she has put in over 13,505 hours at both the 820-substation located next to the pier as well as the main station on Seal Beach Blvd. Many residents will recognize Sukie from years of patrolling along Main Street. When asked about her fondest memories as a VIP, Sukie mentions her many friends as well as the years she worked in the Records Division. She loves living in Seal Beach and will continue her walks and reading her books.

However, this is actually Sukie's second retirement. Many locals will remember Sukie from her years at Safeway, now Pavilions. She is proud to say she "opened it" back in 1967 and stayed with them until 1997. You could find her in the bakery as well as her duties as a cashier. Sukie has also been a world traveler. Her son and his wife now reside in Hawaii, and she has visited them many times. In addition, she has travelled extensively through the United States, Canada, Europe, New Zealand, and the South Pacific. Sukie has called Seal Beach her home since 1960. She loves her home and her many friends. We at the Seal Beach Police Department will miss her and wish her all the best!

MUNICIPAL WATER DISTRICT OF ORANGE COUNTY LEAK DETECTION GRANT

Staff met with Municipal Water District of Orange County (MWDOC) to discuss a grant opportunity that would provide the City the ability to survey 50 miles of water mainline for hidden leaks. In many cases small leaks are difficult to detect and often times are undetectable without specialized equipment. The acoustic leak detection equipment that is used by MWDOC technicians can locate the smallest of leaks that will ultimately prevent water loss and increase the efficiency of the City's water system.

The heavy rainfall from the recent winter storms caused considerable leaves, litter, dirt, and debris to settle at the bottom of West End Pump Station's forebay. Staff recently cleaned up the forebay including the accumulated heavy grime buildup that can restrict flow into the station.
